Aarav Demo

aarav.demo@example.com | Python backend developer | Fictional candidate

PROFILE

Entry-level Python backend developer with a six-month internship and two working database-backed applications.

SKILLS

Python, OOP, lists and dictionaries; Flask, REST APIs, SQLAlchemy; PostgreSQL and SQLite; Git; pytest; Docker; AWS EC2 and S3; HTML, CSS, JavaScript; Pandas.

EXPERIENCE

Backend Intern, SampleApps Lab (fictional) | January-June 2026

Implemented Flask routes for task creation, updates and filtering. Added request validation, consistent HTTP error responses and PostgreSQL storage through SQLAlchemy.

Wrote pytest tests for successful requests, invalid inputs and missing records. Fixed a duplicate-record defect and used Git branches and reviewed pull requests.

PROJECTS

Library API: Personally designed book and loan tables, implemented CRUD routes and transaction handling, and tested checkout and return behaviour with pytest.

Packaged the API and PostgreSQL in Docker Compose. Deployed a demonstration to AWS EC2 with configuration supplied through environment variables; stored generated exports in S3.

Built a small HTML/CSS/JavaScript interface that calls the API. Used Pandas to clean circulation records and generate a monthly CSV report.

EDUCATION

B.E. Computer Science, Example Institute | 2026. Coursework: databases, data structures and software engineering.
