Isha Demo

isha.demo@example.com | Cloud operations trainee | Fictional candidate

PROFILE

Entry-level cloud operations candidate focused on Linux infrastructure, deployment automation and monitoring.

SKILLS

AWS EC2, S3, IAM basics, Linux, Bash, Docker, Terraform, Git, CloudWatch and Python scripting.

EXPERIENCE

Cloud Operations Trainee, Example Infrastructure Lab (fictional) | January-June 2026

Provisioned Linux virtual machines using Terraform and configured basic IAM permissions, security groups and monitoring alerts.

Used Bash and Python scripts to rotate logs and copy backups to S3. Traced failed deployments through service logs and maintained infrastructure changes in Git.

PROJECTS

Static Website Infrastructure: Created S3 hosting, access policies and infrastructure configuration. Documented deployment and rollback commands.

Monitoring Sandbox: Configured CloudWatch alerts for a demonstration EC2 instance and wrote a Python script that summarizes log files.

Container Deployment Exercise: Built a Docker image for an existing sample service and configured environment variables and startup checks.

EDUCATION

B.E. Information Technology, Example Institute | 2026. Coursework: computer networks, operating systems and cloud fundamentals.
