Sara Demo

sara.demo@example.com | Java backend developer | Fictional candidate

PROFILE

Entry-level Java backend developer with a six-month internship and practical Spring Boot, SQL and testing experience.

SKILLS

Java, OOP, collections, exception handling, Spring Boot, REST APIs, Bean Validation, JPA/Hibernate, PostgreSQL, Git, Maven, JUnit, Mockito, Docker and AWS EC2.

EXPERIENCE

Java Backend Intern, Example Services Lab (fictional) | January-June 2026

Implemented Spring Boot routes for creating and updating orders. Added request validation and exception handlers that return consistent HTTP responses.

Mapped order entities with JPA/Hibernate and wrote PostgreSQL queries. Built the service with Maven and added JUnit tests for business rules and invalid requests.

Debugged transaction and null-handling defects; submitted changes through Git pull requests and participated in code reviews.

PROJECTS

Order Management API: Personally designed the order/item schema, implemented CRUD endpoints and pagination, and tested service behaviour with JUnit and Mockito.

Packaged the service in Docker and deployed a demonstration on AWS EC2. Supplied database credentials and application settings through environment variables.

Student Records Service: Used Java classes and collections for validation, PostgreSQL for storage and exception handling for missing or duplicate records.

EDUCATION

B.E. Computer Science, Example Institute | 2026. Coursework: Java, OOP, data structures, databases and software engineering.
