Rohan Demo

rohan.demo@example.com | Recent graduate | Fictional candidate

PROFILE

Recent graduate seeking a first professional Java role. Practical experience comes from substantial academic projects and independent development.

SKILLS

Java, OOP, collections, exception handling, Spring Boot, REST APIs, request validation, JPA/Hibernate, PostgreSQL, Git, Maven, JUnit, Mockito, Docker and basic AWS EC2 deployment.

PRACTICAL EXPERIENCE

Academic Software Engineering Project | January-May 2026

Owned the Java backend for a four-person placement-registration project. Implemented Spring Boot routes for student registrations, profile updates and placement listings.

Designed PostgreSQL entities and JPA relationships, added request validation and exception handlers, and debugged duplicate registrations using transaction checks.

Used Maven for builds, wrote JUnit and Mockito tests, reviewed teammates changes and resolved integration problems through Git pull requests.

PROJECTS

Placement Registration API: Personally implemented service classes, repository queries and pagination. Tested duplicate profiles, invalid requests and missing registrations.

Created a Docker image and deployed a demonstration on AWS EC2 with environment variables for configuration.

Personal Expense Service: Used Java classes, collections and exception handling to validate expenses, PostgreSQL for storage and JUnit for business-rule tests.

EDUCATION

B.E. Computer Science, Example Institute | 2026. Relevant study: Java, data structures, relational databases and software testing.
